Twark, Richard D., and Roger H. Downing. Bias in equalization or market value estimation by using the inversion of the mean assessment-sale price ratio. September: 187–95.
Wadsworth, William M. Comments on Jensen, Artificial intelligence in computer-assisted mass appraisal. March: 25–26.
Willett, Dolores, see Curry.

Subject Index

Adaptive Estimation Procedure

Benson, Colleen A., and Joseph C. Moorman. Updating market values with adaptive estimation procedure. March: 59–82.

Appeals

Malme, Jane H. Property tax administration in North America. December: 235–47.

Artificial Intelligence

Jensen, David L. Artificial intelligence in computer-assisted mass appraisal. March: 5–24.
Wadsworth, William M. Comments on Jensen, Artificial intelligence in computer-assisted mass appraisal. March: 25–26.

Assessment Administration

Almy, Richard R. Interjurisdictional social forces affecting market value assessment. December: 263–76.

Bowman, John H., and John L. Mikesell. Assessment uniformity: The standard and its attainment. December: 217–33.
Jensen, David L. Artificial intelligence in computer-assisted mass appraisal. March: 5–24.
Johnstone, Tom. Social effects of using the market standard in an area of highly fluctuating market values: Interjurisdictional effects. December: 249–62.
Kruimel, Jan Paul. Limits on property taxes in The Netherlands. June: 115–25.
Malme, Jane H. Property tax administration in North America. December: 235–47.

Assessment Bias

Birch, John W., Mark A. Sunderman, and Thomas W. Hamilton. Adjusting for vertical inequity in property assessment. September: 197–211.
Twark, Richard D., and Roger H. Downing. Bias in equalization or market value estimation by using the inversion of the mean assessment-sale price ratio. September: 187–95.

Assessment Cycle

Malme, Jane H. Property tax administration in North America. December: 235–47.

Assessment Ratio Studies

Birch, John W., Mark A. Sunderman, and Thomas W. Hamilton. Adjusting for vertical inequity in property assessment. September: 197–211.
Ramenofsky, Samuel D. The appropriate confidence interval for the weighted mean in assessment ratio studies. September: 173–77.
Ritter, Kevin, and Kenneth Oldfield. Testing the effects of tax increment financing in Springfield, Illinois: The assessor's role in determining policy outcomes. June: 141–47.
Twark, Richard D., and Roger H. Downing. Bias in equalization or market value estimation by using the inversion of the mean assessment-sale price ratio. September: 187–95.

British Columbia—Assessment Administration

Johnstone, Tom. Social effects of using the market standard in an area of highly fluctuating market values: Interjurisdictional effects. December: 249–62.

Canada—Assessment Administration

Johnstone, Tom. Social effects of using the market standard in an area of highly fluctuating market values: Interjurisdictional effects. December: 249–62.
Malme, Jane H. Property tax administration in North America. December: 235–47.

Capitalization

Gilreath, Morgan B., Jr. Mass appraisal with general purpose software: Applying the income approach. March: 27–42.
Ryan, John F. Comments on Gilreath, Mass appraisal with general purpose software: Applying the income approach. March: 43–45.
Simonds, Richard R. Corporate valuations using direct and yield capitalization: A further clarification. June: 149–71.

Certification

Malme, Jane H. Property tax administration in North America. December: 235–47.

Coefficient of Dispersion (COD)

Ritter, Kevin, and Kenneth Oldfield. Testing the effects of tax increment financing in Springfield, Illinois: The assessor's role in determining policy outcomes. June: 141–47.
Sunderman, Mark A., John W. Birch, and Thomas W. Hamilton. Components of the coefficient of dispersion. June: 127–39.

Coefficient of Variation (COV)

Gilreath, Morgan B., Jr. Mass appraisal with general purpose software: Applying the income approach. March: 27–42.
Ryan, John F. Comments on Gilreath, Mass appraisal with general purpose software: Applying the income approach. March: 43–45.

Computer-Assisted Mass Appraisal (CAMA)

Benson, Colleen A., and Joseph C. Moorman. Updating market values with adaptive estimation procedure. March: 59–82.
Curry, Niles, Mathew MacIver, Douglas Murphy, Jan Schreiber, and Dolores Willett. Using a computer-assisted mass appraisal—geographic information system (CAMA-GIS) link to develop a multiregional market model. March: 103–14.
Fish, Frank W., and Frederick B. Kamprad. Using a mainframe-microcomputer interface. March: 47–55.

Gilreath, Morgan B., Jr. Mass appraisal with general purpose software: Applying the income approach. March: 27–42.
Gloudemans, Robert J. Adjusting for time in computer-assisted mass appraisal. March: 83–99.
Hergert, Richard G. Comments on Fish and Kamprad, Using a mainframe-microcomputer interface. March: 57–58.
Jensen, David L. Artificial intelligence in computer-assisted mass appraisal. March: 5–24.
Ryan, John F. Comments on Gilreath, Mass appraisal with general purpose software: Applying the income approach. March: 43–45.
Steiner, Lorraine C. Comments on Gloudemans, Adjusting for time in computer-assisted mass appraisal. March: 101–2.
Twark, Richard D., and Roger H. Downing. Bias in equalization or market value estimation by using the inversion of the mean assessment-sale price ratio. September: 187–95.
Wadsworth, William M. Comments on Jensen, Artificial intelligence in computer-assisted mass appraisal. March: 25–26.

Confidence Intervals

Ramenofsky, Samuel D. The appropriate confidence interval for the weighted mean in assessment ratio studies. September: 173–77.

Discounted Cash Flow Analysis

Simonds, Richard R. Corporate valuations using direct and yield capitalization: A further clarification. June: 149–71.

Education, Assessors

Malme, Jane H. Property tax administration in North America. December: 235–47.

Equalization

Almy, Richard R. Interjurisdictional social forces affecting market value assessment. December: 263–76.
Malme, Jane H. Property tax administration in North America. December: 235–47.
Twark, Richard D., and Roger H. Downing. Bias in equalization or market value estimation by using the inversion of the mean assessment-sale price ratio. September: 187–95.

Equity

Almy, Richard R. Interjurisdictional social forces affecting market value assessment. December: 263–76.

Birch, John W., Mark A. Sunderman, and Thomas W. Hamilton. Adjusting for vertical inequity in property assessment. September: 197–211.
Bowman, John H., and John L. Mikesell. Assessment uniformity: The standard and its attainment. December: 217–33.
Cook, C. Gerald. The effect of homestead exemptions on the tax base and uniformity. September: 179–85.
Johnstone, Tom. Social effects of using the market standard in an area of highly fluctuating market values: Interjurisdictional effects. December: 249–62.
Sunderman, Mark A., John W. Birch, and Thomas W. Hamilton. Components of the coefficient of dispersion. June: 127–39.

Exemptions

Almy, Richard R. Interjurisdictional social forces affecting market value assessment. December: 263–76.
Cook, C. Gerald. The effect of homestead exemptions on the tax base and uniformity. September: 179–85.
Gold, Steven D. Preventing a property tax uprising in the 1990s: Matching policies with problems. December: 276–91.
Johnstone, Tom. Social effects of using the market standard in an area of highly fluctuating market values: Interjurisdictional effects. December: 249–62.
Malme, Jane H. Property tax administration in North America. December: 235–47.

General Purpose Software

Fish, Frank W., and Frederick B. Kamprad. Using a mainframe-microcomputer interface. March: 47–55.
Gilreath, Morgan B., Jr. Mass appraisal with general purpose software: Applying the income approach. March: 27–42.
Hergert, Richard G. Comments on Fish and Kamprad, Using a mainframe-microcomputer interface. March: 57–58.
Ryan, John F. Comments on Gilreath, Mass appraisal with general purpose software: Applying the income approach. March: 43–45.

Geographic Information System (GIS)

Curry, Niles, Mathew MacIver, Douglas Murphy, Jan Schreiber, and Dolores Willett. Using a computer-assisted mass appraisal—geographic information system (CAMA-GIS) link to develop a multiregional market model. March: 103–14.

Income Approach

Gilreath, Morgan B., Jr. Mass appraisal with general purpose software: Applying the income approach. March: 27–42.
Ryan, John F. Comments on Gilreath, Mass appraisal with general purpose software: Applying the income approach. March: 43–45.
Simonds, Richard R. Corporate valuations using direct and yield capitalization: A further clarification. June: 149–71.

Land Values

Fish, Frank W., and Frederick B. Kamprad. Using a mainframe-microcomputer interface. March: 47–55.

Legal Issues

Almy, Richard R. Interjurisdictional social forces affecting market value assessment. December: 263–76.
Malme, Jane H. Property tax administration in North America. December: 235–47.

Locational Analysis

Benson, Colleen A., and Joseph C. Moorman. Updating market values with adaptive estimation procedure. March: 59–82.
Curry, Niles, Mathew MacIver, Douglas Murphy, Jan Schreiber, and Dolores Willett. Using a computer-assisted mass appraisal—geographic information system (CAMA-GIS) link to develop a multiregional market model. March: 103–14.
Fish, Frank W., and Frederick B. Kamprad. Using a mainframe-microcomputer interface. March: 47–55.

Market Value Standard

Almy, Richard R. Interjurisdictional social forces affecting market value assessment. December: 263–76.
Johnstone, Tom. Social effects of using the market standard in an area of highly fluctuating market values: Interjurisdictional effects. December: 249–62.
Malme, Jane H. Property tax administration in North America. December: 235–47.

Mass Appraisal. See Computer-Assisted Mass Appraisal

Microcomputers

Fish, Frank W., and Frederick B. Kamprad. Using a mainframe-microcomputer interface. March: 47–55.

Gilreath, Morgan B., Jr. Mass appraisal with general purpose software: Appiying the income approach. March: 27–42.
Hergert, Richard G. Comments on Fish and Kamprad, Using a mainframe-microcomputer interface. March: 57–58.
Ryan, John F. Comments on Gilreath, Mass appraisal with general purpose software: Applying the income approach. March: 43–45.

Multiple Regression Analysis (MRA)

Gloudemans, Robert J. Adjusting for time in computer-assisted mass appraisal. March: 83–99.

Netherlands, The—Assessment Administration

Kruimel, Jan Paul. Limits on property taxes in The Netherlands. June: 115–25.

North America—Assessment Administration

Johnstone, Tom. Social effects of using the market standard in an area of highly fluctuating market values: Interjurisdictional effects. December: 249–62.
Malme, Jane H. Property tax administration in North America. December: 235–47.

Property Tax Administration

Almy, Richard R. Interjurisdictional social forces affecting market value assessment. December: 263–76.
Bowman, John H., and John L. Mikesell. Assessment uniformity: The standard and its attainment. December: 217–33.
Jensen, David L. Artificial intelligence in computer-assisted mass appraisal. March: 5–24.
Johnstone, Tom. Social effects of using the market standard in an area of highly fluctuating market values: Interjurisdictional effects. December: 249–62.
Kruimel, Jan Paul. Limits on property taxes in The Netherlands. June: 115–25.
Malme, Jane H. Property tax administration in North America. December: 235–47.

Property Tax, History

Almy, Richard R. Interjurisdictional social forces affecting market value assessment. December: 263–76.
Johnstone, Tom. Social effects of using the market standard in an area

of highly fluctuating market values: Interjurisdictional effects. December: 249–62.
Malme, Jane H. Property tax administration in North America. December: 235–47.

Property Tax Reform

Almy, Richard R. Interjurisdictional social forces affecting market value assessment. December: 263–76.
Bowman, John H., and John L. Mikesell. Assessment uniformity: The standard and its attainment. December: 217–33.
Gold, Steven D. Preventing a property tax uprising in the 1990s: Matching policies with problems. December: 276–91.
Johnstone, Tom. Social effects of using the market standard in an area of highly fluctuating market values: Interjurisdictional effects. December: 249–62.
Malme, Jane H. Property tax administration in North America. December: 235–47.

Sales Data

Benson, Colleen A., and Joseph C. Moorman. Updating market values with adaptive estimation procedure. March: 59–82.
Curry, Niles, Mathew MacIver, Douglas Murphy, Jan Schreiber, and Dolores Willett. Using a computer-assisted mass appraisal—geographic information system (CAMA-GIS) link to develop a multiregional market model. March: 103–14.
Gloudemans, Robert J. Adjusting for time in computer-assisted mass appraisal. March: 83–99.
Malme, Jane H. Property tax administration in North America. December: 235–47.

Software

Fish, Frank W., and Frederick B. Kamprad. Using a mainframe-microcomputer interface. March: 47–55.
Gilreath, Morgan B., Jr. Mass appraisal with general purpose software: Applying the income approach. March: 27–42.
Hergert, Richard G. Comments on Fish and Kamprad, Using a mainframe-microcomputer interface. March: 57–58.
Jensen, David L. Artificial intelligence in computer-assisted mass appraisal. March: 5–24.
Ryan, John F. Comments on Gilreath, Mass appraisal with general purpose software: Applying the income approach. March: 43–45.
Wadsworth, William M. Comments on Jensen, Artificial intelligence in computer-assisted mass appraisal. March: 25–26.

Spain—Assessment Administration

Jensen, David L. Artificial intelligence in computer-assisted mass appraisal. March: 5–24.
Wadsworth, William M. Comments on Jensen, Artificial intelligence in computer-assisted mass appraisal. March: 25–26.

Standard on Ratio Studies

Ramenofsky, Samuel D. The appropriate confidence interval for the weighted mean in assessment ratio studies. September: 173–77.

Tax Base

Almy, Richard R. Interjurisdictional social forces affecting market value assessment. December: 263–76.
Cook, C. Gerald. The effect of homestead exemptions on the tax base and uniformity. September: 179–85.

Tax Increment Financing

Ritter, Kevin, and Kenneth Oldfield. Testing the effects of tax increment financing in Springfield, Illinois: The assessor's role in determining policy outcomes. June: 141–47.

Taxpayer Protest

Almy, Richard R. Interjurisdictional social forces affecting market value assessment. December: 263–76.
Gold, Steven D. Preventing a property tax uprising in the 1990s: Matching policies with problems. December: 276–91.

Time Adjustments

Benson, Colleen A., and Joseph C. Moorman. Updating market values with adaptive estimation procedure. March: 59–82.
Gloudemans, Robert J. Adjusting for time in computer-assisted mass appraisal. March: 83–99.

Updating Values

Benson, Colleen A., and Joseph C. Moorman. Updating market values with adaptive estimation procedure. March: 59–82.
Johnstone, Tom. Social effects of using the market standard in an area of highly fluctuating market values: Interjurisdictional effects. December: 249–62.

Uniformity

Almy, Richard R. Interjurisdictional social forces affecting market value assessment. December: 263–76.

Bowman, John H., and John L. Mikesell. Assessment uniformity: The standard and its attainment. December: 217–33.

Cook, C. Gerald. The effect of homestead exemptions on the tax base and uniformity. September:179–85.

Johnstone, Tom. Social effects of using the market standard in an area of highly fluctuating market values: Interjurisdictional effects. December: 249–62.

Malme, Jane H. Property tax administration in North America. December: 235–47.
